March 13, 2001

Report For: Mr. Roger Young
Executive Director of Business
Haverhill School District
4 Summer Street
Haverhill, MA 01830-5877

School: Bartlett

Re: AHERA periodic surveillance

Scope: Under AHERA regulation, schools with asbestos containing building materials (ACBMs) must be surveyed every six months after the original inspection. During the surveillance, Hub visually inspected all assumed and known homogeneous ACBMs in the Bartlett school that were detailed in the original AHERA inspection report. Hub made note of any new damage to these materials, any change in the amount of these materials, and any suspect ACBMs not included in the original report. The survey was done during the week of February 26, 2001 by Susan Boyle, Peter Hahn, Jeremy Zimmer, Scott Smith, and Jim Brimhall.

Findings: This information is noted in the attached 6 month surveillance charts, but we would like to note the following specific materials that require attention and where they are located.

Remove

<u>Location</u>	<u>Material</u>	<u>Comment</u>
Cafeteria	Pipe Insulation (TSI)	3 linear feet separating from pipe and about to fall off

Wet Wrap

Location

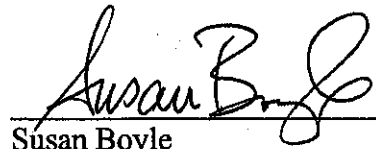

Basement: center
storage (Rm. 8),
back east hall
(Rm. 3E), east
storage (Rm. 7)

Material

Pipe insulation
and hard fittings
(TSI)

Comment

Damage, seam separation
