Mr. Ed. Dufresne
LEA Designated Person
Haverhill Public Schools
4 Summer Street
Haverhill, MA 01830-5877

Ed:

In response to the six month surveillance in the Haverhill Public Schools it was determined that abatement work was necessary in select schools in compliance with the regulation. As some of this material identified as damaged and requiring repairs were presumed to be asbestos containing, samples were collected to verify if they actually were asbestos containing prior to abatement. Hub Testing collected samples at Whittier, Burnham, Walnut Square and Greenleaf Schools for analysis of asbestos. Samples were returned to the lab and found to be non-asbestos containing materials.

School	Location Material
Whittier	Vibration Dampener
Burnham	Boiler Breeching
Walnut Square	Boiler Breeching
Greenleaf	Boiler Insulation

The results indicated these materials were not asbestos containing and therefore do not require asbestos abatement.

The reports of the bulk samples results have been supplied individually by school. These reports should be incorporated into the record keeping program both the main files as well as the individual school's files. As you are aware we are planning on having a meeting with the principals to explain and teach them the record-keeping program. It may be easier to hold their copies of the reports and supply them to them in their boxes at that meeting.

If you have any questions please call.

Sincerely,

Susan Boyle
Vice President
